Music Players and Your Hearing - Answers

Do you *know* how much time you spend listening *to* music on your music device? Do you turn it up so loud you that *can't hear* any outside noise? Well, you may be doing more harm than good!

[Music players are a great source of entertainment, but they are also the cause of *serious* hearing problems for young people today. Research has *found* that young *people* are more *likely* to play their music too loud, which can result in hearing loss later in life.

The ear pieces are designed to fit firmly in the listener's ear canal, *allowing* outside noise to be eliminated. This means that the music is *pumped* directly into the ear, potentially causing permanent *damage*.

The Solar System - Editing

Soccer - Answers

Soccer (or football) is considered the world's most popular sport. *In* soccer, there are *two* teams of eleven players. It is played on a large grass *field* with a goal *at* each end.

The *object* of the game is to get the *soccer ball* into the opposing team's *goal*. *Players* cannot touch the ball with *their* hands (with the exception of the goalie). They can only kick, knee or head *the* ball.

One of the *reasons* soccer is so popular is that it only takes a ball and a flat open area to play.

Dreaming - Answers

Dreams are *stories* and pictures our *brains* create when we are asleep. Most dreams happen when we *are* deeply asleep and our eyes begin to *move* around quickly under our eyelids. This is called *Rapid Eye Movement*.

Some dreams are just *your* mind playing with *thoughts* and images from life. *Other* dreams are an *opportunity* for you to make sense of your life. *Dream* experts also agree that recurring dreams (dreams that you keep having over and over) *probably* have some sort of special meaning.

Although *everybody* dreams (including *a*nimals), we will forget 90% *of* them.

Why Our Bodies Need Water - Editing

Add editing marks to text. There are 20 errors.

H2O, commonly known as water, is essential for the human body to function and vital to our survival. Although we can last weeks without food, we can only survive a matter of days without water. It is important for us to re-plenish our supply of fresh water every day, as we regularly lose liquid from our lungs, skin, urine, and faeces!

All though our bodies are made up of 50 to 75 percent water, one of our most important organs, our brain, is made up of 73% water. We need to stay hydrated to make sure our "brain cells" can function at the optimal level.
