How Animals Move

Written by Katy Pike

fold

Brad is a crab. Crabs walk sideways on their 8 legs. They scuttle and crawl across the sand and rocks.

fold

Frank is a skunk. If skunks are scared, they run, stop and stomp their feet. Skunks hiss, squeal and spray very smelly stuff.

fold

Blue Wing uses its wings to fly. Birds flap their wings and hop to take off. They can glide in the air and then swoop down to land.

fold

Coco is a starfish. Starfish cling onto rocks with their feet. They wriggle and creep over rocks to move.

fold

Roary is a lion. Lions run and pounce on their food. They lie down and roll around on grass.

fold

Animals move in many different ways.

Animal	Movement
Crab	walk sideways, scuttle, crawl
Skunk	run, stomp, spray
Bird	fly, hop, glide, swoop
Starfish	cling, wriggle, creep
Lion	run, pounce, lie, roll

Focus Questions

What do scared skunks do?

How do starfish move across rocks?

Circle the **verbs** in the story.

fold

Animals move in different ways.

I can move like a
