

# ACTIVE LEARNING

## DIVIDE AND CONQUER

Divide and Conquer is a quick game which promotes team building skills such as cooperation and active communication. It allows students to think about division and the concept of remainders.

### Players

Whole class

### Preparation

Prepare strips of paper with basic equations. Distribute these to the students before commencing the game.

### How to Play

1. Provide the class with a division equation. They need to arrange themselves into groups quickly.
2. Those who are leftover play a game of elimination e.g. Knee Tag. The students need to remain in their groups until this is finished.
3. The winner is rewarded by saying the next division equation.

### Variation

This game could be played using addition, subtraction and multiplication.
